Mines and Prospects--Furnaces and Mills

MAMMOTH MINE AS **GOLD PRODUCER**

Sacking Rich Rock From the New Channel That Is Working a

Transformation.

Just to emphasize its position among the foremost of Utah's gold-bearing mines, the Mammoth of Tintle, now coming into the "open market" with a larger tennage of gold-bearing ore than any producer in the State, will in a Third Locomotive With Which to Reshort time come forward with a consignment that promises to worry if it does not uppet the record. For several months this for has been accumulating, the contents coming from a streak of quartz which looks as if there might be a telluride of gold in the fractures and which, is every instance, has revealed sensational values. The streak has persisted throughout the new gold-hearing channel opened up last of the hitherio "main workings," and while at intervals it has mirrowed down almost to the imperceptible, it has never quit. Some of this has, no doubt, crept into to the imperceptible, it has never quit. Some of this has, no doubt, crept into recent consignments which showed a gold valuation of nearly \$70 per ton, with a few ounces silver. Of the very ligh grade there are over 200 sanks now at the mine, the lot to be billed out when it shall fill a car, said an officer of the company yesterday. To the maked eye there is nothing whatever to denote the presence of gold in any unit in the rock in question, the furnace alone revealing its presence, although the miner has now hearned to identify it. On vestoreday's market the managelt. On yestereday's market the manage-ment appeared with 132 tons of gold-bearing one, thirty three of which low while the average of the tempinder was \$20, with the usual amount of sil-ver. In addition to these consignments a 190-ton lot was delivered at the sampler. The treasury is reported in most gratifying condition, and the Tribune is assured that the \$20,000 dividend distributed Monday will be re-peated in September.

ON THE WEST DIP.

Assurance of Inventors That Its Rock Can Be Made to Pay.

The gold-bearing ores on the "nuriforous-hearing muds," as they have been maliciously characterized by some fellow who dumped his roll on the West Dip at who dumped his roll on the West Dip at Mercur in vain effort to recover their precious contents, are to be given auother trial, and to that end a consignment of ore from several of the properties will be subjected to new processes that are glutting the diggings. An owner in one of the properties says he has the assurance of the hiventor of one of these processes that he can positively demonstrate that there-are one or more commercial propositions on the Dip, and that if he falls the commences shall be out only the cost of transportation between the illsted camp and the experiment station in this city. It is claimed for one of these processes that with its methods at least 90 per cent of the metal may be recovered, and that with this the mud or cock, which is very slime, can be made to afford a margin. The inventor of afforher new process claims for his method that it will do even more. Each of these and than it will do even more. Each of these and then the others should be permitted to demonstrate it.

Without exception, the undertakings exploited on the West Dip have been disappointments, however sincere at least one or two were in commenting them as investments. Certainly these disappointments have been a source of injury to the ladustry in this State, and the least that the founders can do is to throw the field open to experiment. Mercur in vain effort to recover their

THE ESTELLA MILL.

Foundation for the Plant Now in With Machinery Ordered.

For the new mill with which the properties of the Estella Mining comproperties of the Estella Mining com-pany out of Millord are being equipped the orders for machinery have been placed with a Milwackee house, said Hugh Tarbet, who has been vietting his son, Mamager Samuel Tarbet, at camp, the plant to be put in operation as soon as it is possible to accomplish it. The trials made at the Baxter plant down there have demonstrated conclusively, said the former, that Estella ores, which show an average of \$10 gold per ton, can be made to afford a handsome profit with amaignmation and subsequent leaching by the cyanide process. The foundation for the new plant has now been completed, and with five stamps dropping twenty tons will be reduced daily enlargements to follow.

Mr. Tarbet, Sr., has accepted the management of the Arrow Mining company's properties on Arrow Range, Lincoln county, Nev., and will depart for that camp about September 1, to inaugurate systematic work.

MAKING GOOD PROGRESS.

Campaign of Construction at the New Camp of Copper.

Joseph Dederichs, superintendent of construction down at Newhouse, came up from that camp of copper again yesterday morning much pleased with the progress of work in all directions. On Monday night the railroad between Frisco and its terminal at Newhouse had been completed to a station three and a half miles out of the former, while sixty persons are now employed on the grade between Newhouse and the mouth of the long tunnel out of which the wealth of the mines will pour into the reduction works at camp Mr. Dederichs reports some of the structural material now moving west, with a great deal to start within the next thirty days, and with every condi-tion now favorable to the completion of equipments as scheduled.

CRIPPLE HAS RADIUM.

Its Miners Discover That They Have

Been Wasting Millions. DENVER, Aug. 16.-Radium ore has been discovered at three different places Cripple Creek district. At two places the ore has been found in a welldefined vell. seems been found in a welldefined vell. seemsing from eighteen
inches to two feet in width, while at another place it is scattered around in the
float on the surface in large quantities
and is known to exist at a very good
depth in one sincit. Thousands of dollars
worth of the precious ore has been thrown
over the dumps by the people operating
mines in the sections referred to because
they did not know that it had any value.

TO HANDLE SLAG

move the Stuff at Bingham Con. So satisfactory has been the service of the electric locomotive in the handling of slag at the Bingham Con. smelter that an order for a third machine was yesterday placed with Fred C. Richmond, the mechanical engineer for the Salt Lake Hardware company. The two machines now in use at the plant have revolutionized the handling of the slag, and with the three in opera-tion and a fifth furnace in commission Superintendent Nutting will be prenew record among the pyritic plants of the valley.

DAY ON 'CHANGE.

Market Generally More Active With Prices Maintained.

on the sale of 21,100 shares of stock that rought \$3850.53 and with the market not without an element of buoyancy, however thort it may have been on sprinters Yankee Con., on favorable reports from its Thitle properties, and a revival of runors that a dividend was likely at any more that a dicidend was likely at any time, was again in active demand and moved rapidity up to 3815 cents, although it forfeited its gains at the afternoon nession, while Daly West railied and sold at \$1.02\to with Daly West railied and sold of \$1.02\to with Daly filling an order at \$2.30. Con. Mercur came out to a bid of 11\to cents at the afternoon session, with Sacramento changing hands at 11\to and Star Con. at 14\to Heavy buying orders sent New York up to 4 cents, while Bonanza of Goldfield was in good demand at 5-cents, with Ajax changing hands at 2\to cents. Grand Central was an offering at \$1 and Silver King at \$14, with \$1.50 bid for Daly Judge, the day closing on the following market: A. M. P. M

THE TRIBUNE NEWS STANDS. RICH GOLD FINDS ALONG SAN PEDRO

Prospectors Exploring the New Field With Good Results-Some Samples at the Assay Furnaces.

Rarely a sun sets now that among the local assay offices there is not to be found a certificate or two with which to emphasize the merits of diggings along the margins of the San Pedro road, and that a cluster of most productive camps will have begun to contribute to its revenues before the expiration of another year is now quite positively assured. Among recent assays to which this profession is testifying and in which not a little interest is manifested locally, is that which tells of the presence of ore in what is known as the Bullock locations, cut of Veges ranch, the certificates showing over \$100 gold the certificates showing over she had been prospecting the country for several mofths, not a little free gold was revealed, but these were "picked samples" and told their own story without the aid of the their own story without the aid of the furnace. Of course the gentleman returned to the south much encouraged. A letter from Caliente to The Teibune, during the day, says that on the arrival of Mr. Builock there on his way to the "Old Glory" group, twenty-two miles southeast of Las Vegas ranch, he showed an assay which certified to the presence of \$114 gold per ton. In the same locality others are mining with same locality others are mining with many prospecting the field and hig results are not at all unlikely during the next few months.

FOUND RICH ORE.

Rock Containing Big Values in Gold on the Virgin River. Special to The Tribune.

CALIENTE, Nev. Aug. 15.—Charles Murray and Frank Misson came through camp today, in company with Hon. Joseph Trevor, formerly Mayor of Cleveland, an uncle of Milsap. They are enroute to Los Angeles vin the San Pedro
and buckboard between the termini of the
read. They will stop for a week or teadays at a group of silver-gold claims tocated by Murray & Milsap in February,
twelve miles south of the line near Los
Vegas, and if an examination by Mr. Treyer is satisfactory, men will be put to
work developing the claims.

W.F. Smart and Jos Dyer came in today from their claims north of Moniasummit, where they have just completed
an eighty-foot tunnel and cross-cut on a
yein two feet wide of gold-capper going
well in both metals. They brought several facts of samples to have assayed in
Sait Lake.

Moreis Wilbur and Tim McCarty report eph Trevor, formerly Mayor of Cleve-

Lake.

Lake.

Corris Wilbur and Tim McCarty report

Salt Lake.

Morris Wilbur and Tim McCarty report 125 feet of a tunnel completed on their Gid Ireland claim, twenty-five miles south of the upper Virgin river, where they cross cut twenty-three inches of \$82.00 free gold ore. They are going East next week to try to place their group with Chicago friends.

"Doe" Flemming, who passed through here two weeks ago with samples of tellurium and free gold from his claims on the Virgin river, returned today, and, it his assays are all right, has opened upone of the richest cisims in southern Newada. The former went \$358 and the latter \$156 per ton, and he claims to have frem eight inshes to one foot four inches of this valuable ore, if event went end a large scale.

Boyd Young reports having sunk eighty-five feet on his Olympia claim north of Mospa twenty miles, on a four-foot ledge of gold and black exide of copper, and says he has ten tons of shipping ore on the dump.

Charles French and Matt Dugan re-

the dump.
Charles French and Matt Dugan re-turned from Chayenne today and went back to work on their Stars and Stripes back to work on their Stars and Stripe group of free gold claims near the Virgi fiver. They have a 140-toot tunnel ro on twenty-six inches of \$42.10 free gol-and a seventy-five-foot shoft on the same edge. They had a large supply of grul and mining material with which to con-fine work.

Willis B. Hewlett, expert for Brown & Hewlett of New York, passed through amp resterday on route to Los Vegus, where he will go twenty-five miles north to examine Burns & Flynn's Four Acts pold-copper group.

UTAH IN BOSTON.

Demand for Local Securities and Their Eastern Position.

The Bulletin, reviewing the market at Boston, says: "There was no great nerly-Ity in United States Mining, but the price held around \$22. Brokers say the stock is very strong, and one house sold 1000 shares the other day for a trading customer without breaking the price one-eighth. There was a spasmodic upward movement in Utah in the early part of the week, based on buying by New York, The stock did not quite reach \$10. Boston is not as builtsh on Utah as is New York."

Ores and Bullion.

In the ore and builton market the day's settlements amounted to \$102,400, McCornick & Co. reporting them as they follow: American builton, \$44,400; gold, sitver, lead and copper ores, \$35,000.

In the metal murket pilver ruled at \$75, cents an ounce, lead at \$2,500,410 per hundred pounds, and casting copper at \$15, cents a pound.

Mining Notes.

Ernest Bamberger, assistant manager of the Daly Went, left for the East yes-terday morning, his pilgrimage to include the St. Louis Lair.

the St. Louis fair.

Manager C. E. Loose of the Grand Central was among the visitors from Tintic yesterday. He reports the main shaft again dropping down.

H. N. Bowen, for the past year superintendent of the Annie Laurie company's mines at Kimberly, has resigned. The company sustains the loss of another good man, to whem it is largely indebted for the excellent condition of its ore bodies.

The Star Con. of Tintic vesterday dis-

The Star Con of Thric yesterday dis-posed of three carlonde of second-class-ore, with the proceeds of which it was very well satisfied and with the co-opera-tion of smatter and railroad the manage-ment sees how it can confinue to come to market.

John H. McChrystal has returned from Chater, Idn. where he has been conduct-ing an examination of mining properties for local clients.

Milan Packard former president of the Star Con. of Tintle, came up from Spring-ville yesterday to confer with the di-rectors.

W. B. Devereux, a prominent mining en-gineer whose name has been identified with some of the foremost of Western mines for many years, came in from New York yesterday and, with Manager Chan-ning of the Utah Con, devoted the after-noon to a study of the smeller. W. C. Alexander of the Black Diamond has gone to its Stockton properties.

Manager M. M. Johnson of the Boston

Capt. S. M. Koshler, U. S. A., came in from Leavenworth, Kan., yesterday and will depart for Park City this moraling to look personally into the resources of the Daly West, in which he is a shareholder. The Captain has been ordered to the Philippines, for which he will depart is a short time.

Con left for its Elingham properties yes-

Prof. W. H. Tibbals, accompanied by Mrs. Tibbals, will leave for Portland, Or-on Tuesday to attend the session of the

William II. Child of the Sacha Mining company has returned from its mines and all in Humboldt county. Nevada, much accompanied by conditions there, He was accompanied by President Bartch and Prof. Talmage, Upon an expression from he latter, local interests will wan with much enverges.

Manager D C Jackling of the Utah opper company left for camp usain dur-ing the afternoon.

S. I. Hallet is projecting a trip into the southern country, via the San Pedro.

Dr. Weldman, a Pennsylvania shareholder in the Honerine, inspected its
mines and mill yesterday, in company
with Assistant Manager Levy

George A. Robertson left for the Eritan-nia mines, out of Vancouver, E. C., Mon-iny night.

Ed. Haffman, whose intelligent efforts are doing so much for the Silver Shield and United Bingham, came in from camp last stells.

H. A. M. Froiseth, who has been ap-pointed the representative of the Salt Lake Real Estate Exchange to collect ore samples for its permanent mineral ex-hibit, leaves teday for Tinto in the inter-set of the exhibit. Mr. Froiseth has just returned from Bingham, where he was most fortimate in securing specimens from the big mines there.

WEALTH OF YAMPA CONTINUES TO GROW

All Avenues Extending in Ore With 200 Tons Going Daily to the Company's Smelters.

From Yampa mines at Bingham there s now going to the Yampa smelter in Bingham canyon as much as 200 tons of ore daily, with this to be more than of ore daily, with this to be more than doubled when the capacity of the latter, for which contracts have been awarded, shall have been increased, said W. H. Craig, the superintendent of the bonanza, who came in from camp yesterday. In the production of the present tomage, which is an enormous one in the average camp, no stoping whatever is being done, said the super-intendent, the ores coming entirely from development and the extension from development and the extension of the levels into the great copper, gold and raiver-bearing zone. With every wift the resources of the company are nersueing, added Mr. Craig, and there is no doubt at this time as to its position in the conclave of big eness. For everal years, or since the completion of the main tunnel through which the pressure are several, the work has been in om development and the extension s are spewed, the work has been in the volume new blocked out among largest in the country. Since the egeneration of the smelter was begun under the direction of Mr. Bellinger re-ults have been infinitely improved, and sults have been infinitely improved, and while the plant, which it was necessary to reconstruct, is yet incomplete, the company is using up wealth and making it possible to perfect its equipment without necessing the treasury. The management may be relied on to place the Yampa among the most productive of Eingham before the expension of another year. The wealth awaits it under ground and efficient methods
